Growth system: Spurred cordon

Ground Type: Medium mixture rich of skeleton

Grapes : Sangioveto (40.00%), Cabernet Sauvignon (20.00%), Merlot (20.00%), Syrah (20.00%)

TOSCANA

Wine has literally been a part of the Tuscan civilization for over 3,000 years. From the time the ancient Etruscans settled in the gentle rolling hills of Tuscany, viticulture and wine production have been an important element of everyday life and indeed was even considered to be mystical. Tuscany is a much larger region than many people realize and it encompasses many different wine regions and climate types. The one thing most regions have in common is the selection of grape varieties. In general, Sangiovese is the dominant red varietal and Trebbiano is the dominant white varietal. The north west of Tuscany is mountainous and is famous for the beautiful Apuan Alps. The climate in the north is continental with hot summers and freezing winters.
